

# Do you take security measures for your PC and smartphone?

It is very important to take security measures for your PC and smartphone.

For those who don't know what to do, we show some quick and easy measures!

① Keep your OS or software updated

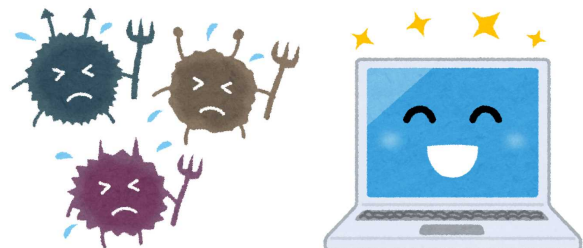

PASSWORD...

② Use strong password

③ Install anti-virus software

If you don't take basic security measures, your PC and smartphone could be infected with a virus, and be at risk of unauthorized access.

"Now" is the time to take security measures!
